# CO SNI IN-LINE PUMPS

### **Handled Liquids**

Clean or slightly contaminated low viscosity liquids without solid & fibrous particles.

#### **Technical Data**

Discharge Flange \_\_\_\_\_DN 40.....DN 150 mm Capacity up to  $200 \text{ m}^3/\text{h}(*)$ Head \_\_up to 100 m(\*) Operating Temperature\_\_\_\_\_-10 °C' to +140 °C (\*\*) Casing Pressure (Pmax) 10 bar (16 bar)(\*\*) (Pmax: Suction Pressure + Shut o Head)

- (\*) Contact company for higher capacity and head values.
- (\*\*) The Material of pump differs according to the type of pumped liquid, operating temperature and pressure. Contact for detailed information.

- ·All impellers are balanced dynamically or statically according to ISO 1940 grade 6.3.
- •Axial thrust is balanced by impeller balancing holes system.
- Direction of rotation is clockwise viewed from drive end.
- •In case of request, wear ring and/or shaft sleeve can be supplied.
- •The pump and motor have seperate shafts connected by a rigid coupling or through slide fit shaft. Axial and radial forces are absorbed by electric motor bearings.

#### **Design Features**

- •In-line, rigidly-coupled, volute casing, single stage centrifugal pump with closed impeller.
- ·All impellers are balanced dynamically or statically according to ISO 1940 grade 6.3.
- •Suction and discharge flanges conform to EN 1092-2 / PN 16. The flanges are according to EN 1092-1 / PN 16 for steel or stainless steel casing. In case of request, ANSI/ASME flanges can be supplied.
- •Pumps are rigidly coupled with electric motors of IEC frame sizes with high eciency class.

#### Shaft Sealing

•Depending on customer request or liquid type, mechanical seals are available.

#### **Pump Designation**

ECO SNL 100 - 250 - XXX

Pump Type.
